

Victory Park Update

Victory Township continues to progress on improvements to Victory Township Park on upper Hamlin Lake. Currently a new steel seawall is being installed in front of the existing wood sheet piling that is structurally failing. The existing boat launch has been repaired after becoming unusable from winter's effects on the an old structure. The permit application is being submitted to the MDEQ to install a new boat launch. The new launch will be significantly larger (20' wide x 25' long). The existing boat launch will be converted into a soft launch site to accommodate canoes and kayaks. The parking area will be enlarged to accommodate more vehicles with trailers and single vehicle parking. Improvements in recent years at the park have included a hiking trail system, lakeside benches, grills and picnic tables at the pavilion. This park provides an excellent view of upper Hamlin Lake. The area is frequented by those interested in seeing a diverse population of birds. Eagles are a common site .

It is very gratifying to see Victory Township continue to restore and improve this public park.
