

## **Algae Committee Meeting Notes 5-9-15**

**Following is the plan for the summer of 2015**

- **Bruce, Lynn and Wayne A. to meet with Seth Earl to discuss phosphorus problem. Bruce to let Wayne/Lynn know when he is available.**
- **Lynn and Wayne D. will measure bottom oxygen in the upper lake starting in mid-June.**
- **Flow measurements and phosphorus levels will be determined in tributary streams from mid-May through mid-August. If data is found to be similar to 2014, sampling may be discontinued.**
- **Weekly surface temperatures will be obtained over the deep basins in the upper and lower lakes while taking the Secchi readings.**
- **Monthly phosphorus samples from the surface will be taken over the deep basins.**
- **Monthly bottom water samples from the upper lake deep basin will be tested for phosphorus.**
- **After identifying anoxic sites in the upper lake, bottom samples will be taken for phosphorus.**
